PROFESSIONAL SUMMARY

Data Analyst and Bachelor of Computer Applications (BCA) graduate (Christ University, March 2026) with hands-on experience in SQL, Python, Power BI, Tableau, Looker Studio and Grafana from a Data Analyst internship, plus eight end-to-end data science, machine learning and analytics projects. Built a deployed content-based recommendation system (TF-IDF, cosine similarity) on a PostgreSQL cloud database and authored a research paper on regime-aware deep learning (CNN, BiLSTM, attention) for financial time series forecasting. Seeking an MSc in Data Science to deepen skills in machine learning, statistical modelling and data engineering. IELTS Band 8.0.

EDUCATION

Bachelor of Computer Applications (BCA) — July 2023 – May 2026
Christ University, Bangalore, India

- Result: First Class, CGPA 8.35/10 (3.34/4.0); degree awarded 29 May 2026
- Relevant coursework: Principles of Data Science, Artificial Intelligence and Machine Learning, Introduction to Python, Advanced Python, Data Structures using C++, Design and Analysis of Algorithms, Discrete Mathematics, Foundational Mathematics, Graph Theory, Cloud Computing, Cyber Security, Data Processing with Spreadsheet, Full Stack Development, Advanced Java

ISC (Class XII), Commerce with Mathematics and Computer Science — 2023
D.B.M.S. English School, Jamshedpur, India | 92.67%

ICSE (Class X) — 2021
D.B.M.S. English School, Jamshedpur, India | 94%

PROFESSIONAL EXPERIENCE

Data Analyst Intern — November 2025 – March 2026
PriyaQubit Pvt. Ltd.

- Analysed and transformed datasets using SQL and Python (data cleaning, data wrangling, exploratory data analysis) to identify trends and prepare structured data for reporting.
- Designed interactive dashboards and visual reports in Power BI, Tableau and Looker Studio to track key business metrics and KPIs.
- Built real-time monitoring dashboards in Grafana to visualise operational data and improve data visibility for stakeholders.
- Integrated and processed data from multiple sources with Excel and SQL queries to support accurate, data-driven decision-making.

PROJECTS

Udemy Course Analysis and Recommendation System — October 2025
Full-Stack Data Science Project | GitHub

- Built an end-to-end data pipeline (data cleaning, feature engineering, analysis) for 3,600+ Udemy courses and migrated the dataset to a Supabase (PostgreSQL) cloud database to power live analytics.
- Developed and deployed a multi-page Streamlit web application with a content-based recommendation system (TF-IDF, cosine similarity), a dynamic pricing optimiser, and an analytics dashboard built on 10+ SQL views.

Trading Behavior vs Market Sentiment Analysis — May 2026
Python, Statistical Analysis | GitHub

- Analysed 211,218 Hyperliquid cryptocurrency trades (32 traders, 246 coins, May 2023 – May 2025) and merged them with 2,644 daily Fear & Greed Index records by date at a 99.99% match rate.
- Used Python (Pandas, NumPy, Matplotlib, Seaborn) in Jupyter Notebook for correlation, volatility and profitability analysis; found the highest win rate (89.17%) and profit factor (11.02) in Extreme Greed periods and a -0.27 correlation between sentiment score and trading volume.

Finnova Finance Training App
July – September 2025

Flutter, Real-Time Market Data | GitHub

- Built a finance and trading learning platform integrating real-time stock and index prices, financial news, financial calculators and portfolio tracking.
- Implemented a paper-trading feature that lets users practise trading on live market data without financial risk.

NYC Tree Census Analysis
September 2025

Tableau | Tableau Public

- Visualised the NYC tree census dataset and built interactive dashboards to explore species diversity, tree health and geographic distribution.

Airplanes vs Wildlife
August 2025

Tableau | Tableau Public

- Analysed U.S. aviation wildlife-strike data and built Tableau dashboards showing incident frequency, damage and trends over time.

Nashville Housing Data Cleaning and Analysis
October 2025

SQL, Microsoft SQL Server | GitHub

- Cleaned and standardised housing data by formatting dates, populating missing addresses, splitting fields and removing duplicates using SQL data transformation and validation.

COVID-19 Vaccination Data Analysis
October 2025

SQL, Microsoft SQL Server | GitHub

- Processed a COVID-19 vaccination dataset to calculate coverage metrics and identify trends, applying advanced SQL (aggregation, data cleaning, integrity validation).

Job Postings Analysis
May 2025

SQL, PostgreSQL | GitHub

- Wrote SQL queries on the 2023 job postings dataset to identify in-demand skills and hiring trends, using advanced filtering, aggregation and database management.

RESEARCH

Enhanced Financial Forecasting with Regime-Aware Neural Networks
July – September 2025

Research Paper | Preprint

- Developed a novel deep learning architecture combining multi-scale convolutional neural networks (CNN), bidirectional LSTMs (BiLSTM) and regime-aware attention gating to improve financial time series forecasting.
- Achieved $R^2 = 0.711$ and 81.4% accuracy with specialised single-task models, providing insights into task-specific optimisation and model selection in quantitative finance.

TECHNICAL SKILLS

- Programming and Databases: Python, SQL, C++, Java, PostgreSQL, Microsoft SQL Server, Supabase
- Data Analysis and Machine Learning: Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA), Data Cleaning, Feature Engineering, Machine Learning, Deep Learning (CNN, BiLSTM, Attention), Time Series Forecasting, Recommendation Systems (TF-IDF, Cosine Similarity)
- Data Visualisation and BI: Power BI, Tableau, Looker Studio, Grafana, Excel, Dashboard Development, KPI Reporting
- Data Engineering and Cloud: Data Pipelines, SQL Views, Data Migration, Google Cloud, Web Scraping (BeautifulSoup)
- Tools and Platforms: Jupyter Notebook, Google Colab, Streamlit, Flutter, Git, GitHub
- Soft Skills: Analytical Thinking, Problem Solving, Communication, Teamwork

CERTIFICATIONS

- International English Language Testing System (IELTS) – Band 8.0
- Data Scientist: Analytics Specialist – Codecademy
- Deep Learning and Neural Networks – Infosys Springboard
- Machine Learning with Python – Infosys Springboard
- Google Cloud Computing Foundations Certificate – Google
- Data Structures and Algorithms – Udemy

LANGUAGES

English (Fluent), Hindi (Native)
